The VYTAL Cart Series Filters

Pre-Filtration Cartridges

For your **upstream/pre-filtration needs**, the VYTAL Cart offers a comprehensive range of customizable pre-filter cartridge options including:

- QCR™ Series Filter Cartridges
- QSL™ Series Filter Cartridges
- QMC/QMA™ Series Filter Cartridges
- PMC/PMA™ Series Filter Cartridges

Whether you're dealing with particles or microbial contaminants, our cart is adaptable to meet your exact specifications.

ZTEC™ WB Membranes

Graver Technologies ZTEC™ WB are USA-made, ISO Class 7 cleanroom integrity-tested membrane filters specifically designed for the removal of spoilage organisms and particulate matter prior to the bottling process.

These high-performance filters utilize a specialized pleated TECpore polyethersulfone (PES) membrane available in pore sizes of 0.45, and 0.65 μm , each offering exceptional retention efficiency.

This advanced membrane technology ensures that the filtration process not only improves clarity but also helps maintain the product's quality, taste, and character by preventing contamination. Also, the extended on-stream life of these filters reduces the need for frequent replacements, leading to cost savings and operational efficiency.

Elevating Your Wine Production Process

We stand ready to support wineries in your pursuit of excellence with the VYTAL Cart Filtration Package. What's more, our warehouses are strategically located to allow for one day shipping of in-stock items. **Call us today!**
